SUMMARY: Teaching is more meaningful when the process is attuned to the needs, goals and strengths of more learners. Department of Zoology thus organised 2-days workshop on practical demonstration of ELISA for the UG Students, Department of Zoology, Gurudas College, Kolkata with a view to extend academic assistance beyond our own institutional classroom. Through this 2-day long assistance program, all the participant students attained practical knowledge on the process of sandwich ELISA technique and its uses in different fields of biological science research as well as in the field of medical science. They were trained on handling and use of sophisticated instruments and techniques in addition to preparation of different chemicals needed for the assay. A thorough discussion was held on the basics for preparation of common laboratory chemicals, reagents and buffers. Teachers provided lots of information on other types of ELISA which are being used in different fields of biological and medical sciences. The workshop ended with an elaborate questionnaire session involving all participants and resource persons together with other teachers of the department.
