

## **BIMONTHLY REPORT FOR ECHO [Jan'22 – Feb'22]**

**“Preparation of Bio-fertilizer from daily domestic kitchen wastes to reduce the unwanted hazard of chemical fertilizer in the environment, surrounding Kolkata Metropolis a basic initiative” - City College, 102/1 Raja Rammohan Sarani, Kolkata - 700 009**

The decomposition process of used tea leaves, and all sorts of vegetable wastes from domestic places, local food stalls and restaurants in earthen pots is at the verge of completion [can be documented from the following photographs]. In coming month it will be applied on to various plants to check its effectivity on the growth and development of the plants as bio-fertilizer.
