Short Communication

COVID-19 is an infectious disease caused by a new coronavirus for the first time. COVID-19 is a threat to mankind. On 31st December, 2019, WHO was informed of a cluster of cases of pneumonia of unknown cause detected in Wuhan City, Hubei Province of China. The coronavirus disease (COVID-19) was identified as the causative virus by Chinese authorities on 7 January, 2020. Since then 203 countries of the world has been affected by the deadly virus having confirmed cases of 6,38,146 people with a death of 30,039 persons as on 30th March, 2020 (WHO Report).

To combat the disease and to find out possible therapies from these ailment scientists, researchers, academicians, experts have been working hard day and night. The scientific fraternity has taken oath to get rid of the pandemic and save the human society from devastation. As a result of continuous research work, huge numbers of articles in the form of short communication, review article, full text articles, report, and correspondence in different areas of COVID-19 research are coming out daily. Keeping in mind of the urgency of accessibility of published literature, publishers put the articles related to COVID-19 in open source so that anybody can access without any hindrance.

The immediate need of the hour is to provide information of published literature to all concerned. The authors have prepared the bibliographic details of **11,134 journal articles being carried out globally and published during 2019 to May, 2020 as reflected in the *PubMed* database.** The record is not an exhaustive one and our endeavour is to update it on regular basis and communicate the same to all concerned.

Scope and Methodology: The present list of publications covers 11,134 journal papers on the Coronavirus disease (COVID-19) at the Global level perspectives during 2019 to May, 2020. Popular *PubMed* database of the United States National Library of Medicine (NLM), United States has been consulted to disclose the details journal articles.

Arrangement: The list of publications contains four headings i.e. Sl. No., Title of the paper, Author, Source Journal, Publishing year and DOI. The list is arranged according to ascending order of the Title of the paper.

Accessibility of Full Text: The user may copy the title of the paper and search on web to access the full text.

We hope that this record will be of much helpful to the scientific fraternity for further research & study.

**Mr. Dhiman Mondal
